

UNI-ROV 200[©]

UNI-ROV 200 is UNITEC new and innovative solution for every kind of dry fruit tipping which allows high capacity (up to 70 large bins/hr) and great gentleness thanks to the new patented technical solutions.

UNI-ROV 200 is the only large bin tipper, with continuous process, that enables the tipping without vibration, even with high capacity large bins and non spherical fruits (such as kiwi fruits)

UNITEC
GROUP

GENTLENESS

UNI-ROV 200 guarantees maximum gentleness when tipping thanks to a greater bin inclination which reduces the height during the unloading of the fruit on to the outflow chute.

VERSATILITY

UNI-ROV 200 enables the tipping of all sorts of large bins since it is auto-adjustable in height. It operates with different size bins.

TECHNICAL FEATURES

Max Capacity	Electric Power Installed	Tipping inclination	Bins external dimension (min)	Boxes external dimension (max)
Up to 60 bins/hr	4 kw	132°	1000x1000x540	1220x1220x760

SAFETY

UNI-ROV 200 guarantees **maximum safety** thanks to the complete introduction of the bin into the unit structure during the tipping, and thanks to the photocell system that brings the machine to a halt in case of inappropriate staff use.
