A REGULAR UPDATE ON WHAT'S HAPPENING IN THE WORLD OF FRUIT AND VEGETABLE PACKAGING AND HANDLING

INCREASED PACKING CAPACITY AND LESS DOWNTIME WITH THE PA25/POLYBAGGER/XARPA LINE AND AFTER SALES SERVICE SECOND TO NONE

“We needed higher output and with the installation of the PA25/Polybagger/Xarpa line from edp® we’ve had great results.”

Stan Stamatis,
Director, Manuels Potatoes Pty. Ltd.

Established 28 years ago and based in Fyshwick, ACT, family owned business (four brothers), Manuels Potatoes Pty. Ltd. is primarily involved in packing potatoes and onions, has a full time staff of around 20 people and serves the local supermarkets and clubs in Canberra. The business also handles watermelons and pumpkins from time to time.

“The equipment was installed about 12 months ago, initially to increase our ability to pack large volumes of onions and brush potatoes” says Stamatis. “The old equipment was getting a bit tired and wouldn’t pack as fast as we wanted it to. We needed a higher output and the new PA25 packs at least 30% to 40% more per hour. Also, with less down time we can pack even more and an increase of between 50% and 60% greater capacity over our previous equipment is achievable.”

“We installed the Xarpa line (Daumar Net Bagger) as it is what customers want at the moment.”

“We are actually getting our

infrastructure in place for further growth and we are looking to put another installation in” says Stamatis.

“We chose edp® because their after sales service is second to none” he added. “If you’ve got a problem they’ll stick by you until they’ve got it fixed – and they’ll get it done quickly.”

“When you are using packing machines you have to deal with someone who is reliable. Also, with computer controlled packing equipment you need someone local who knows their stuff and is committed to after sales service. edp® have been great.”

Increased packing capacity – less down time. It’s as e-sasy as edp®.
