With 60 years in the Fruit and Vegetables industry we have the expertise and experience to give you, our valued customer, the best and most reliable equipment economically possible

e-asy as..

Features:

The One Tonne Bag Filler is available in both manual and automatic versions. There is no need for an operator with the automatic model. As it fills the one tonne bag, the elevator raises. Once the bag is full the belt stops. With the optional creep feed, product can be accumulated when the bag is changed. The machine will fill lift the full bag off the floor to allow the pallet to be placed under it.

The elevator is of a 'gooseneck' nature so the delivery of the product is as gentle as possible. The unit is controlled by a common hydraulic power pack and is easy to operate. All electrical wiring on the unit conforms to AS3000.

Special Features:

- Gentle "Gooseneck" delivery of product
- Fully self-contained hydraulic system
- Fork lift slipper for easy mobility
- Simple fitting & removal of bags
- Low delivery height of bag

Options:

- Creep feed accumulation hopper
- Variable speed elevator
- Automatic lift
