

PA25

Automatic Weighing machine

- ▶ User friendly data entry touch screen and operation.
- ▶ Painted or stainless steel construction.
- ▶ Capable of handling a full range of fruits and vegetables: citrus, onions, potatoes, tomatoes, garlic, Brussels sprouts, peppers, etc...

DAUMAR

PA25

► **Operator friendly:** No manual adjustments are required with the PA-25 as all commands are entered via the touch screen. As different types of produce, and different sizes of packs require various conditions to achieve the optimum performance, the PA-25 can store individual product profiles. These can be recalled by simply entering a number into the keypad. Production data can be obtained on the LCD screen, to enable the packing plant manager to monitor the performance of the weigher, ensuring economical performance at speed. The PA-25 also has a self-diagnostic program, which tests all components, and allows engineers to locate problems quickly and efficiently.

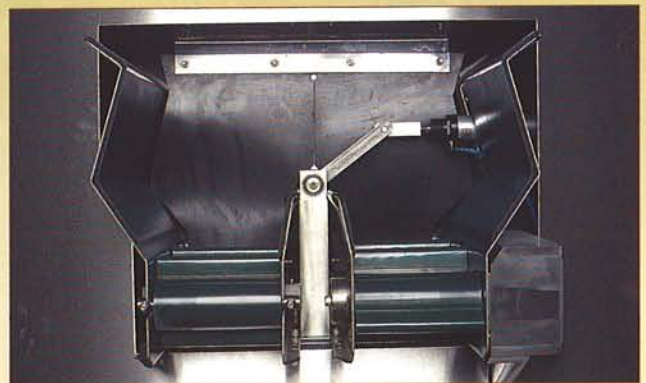

Upper view

	Weight	Length	Width	Height
PA-25	555 Kg.	1.900 mm	1.500 mm	2.400 mm
Vertical Elevator	259 Kg.	1.650 mm	1.000 mm	2.815 mm
Long Elevator	259 Kg.	3.900 mm	1.000 mm	3.100 mm

► **Output:** Depending on the machine version and weight of package to be made, the PA-25 can produce from 25 to 45 packages/min.

► **Double exit belt version:** Allows to work simultaneously with two packaging machines, ensuring economical performance at speed (up to 45 bags/min.)

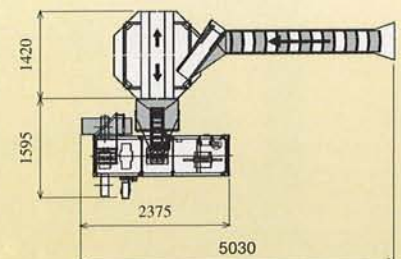

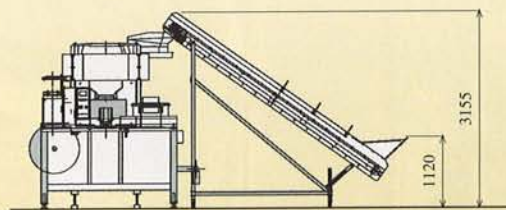

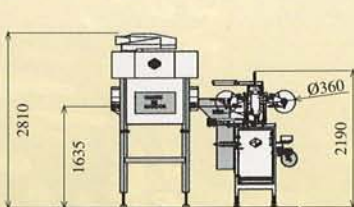

► **Feeding Elevator:** Two different lengths are available: vertical type (1.650 mm) and long type (3.900 mm.) in order to adapt the layout requirements and space available.

Front view double exit belts

TECHNICAL CHARACTERISTICS PA-25	
Drives:	1/4 HP, 1/3 HP, 1/2 HP (elevator)
Voltage:	220-380-415 V.
Cycles:	50-60 Hz.
Power consumption:	0,9 Kw + 0,37 Kw (elevator).
