With 60 years in the Fruit and Vegetables industry we have the expertise and experience to give you, our valued customer, the best and most reliable equipment economically possible

FEATURES

The edp® Polybagger is a tried and proven bagger, used for the packaging of 1kg to 6kg plastic wicketed bags with produce and or components automatically.

The bagger is compatible with all combination weighers such as Daumar PA-25 or 38, the Newtec, the Manter, Bottazzi or Sorma. The speed of the bagger depends on the counting or weighing machine but is capable of up to 25 bags per minute depending on size and product.

The support belt is raised and lowered (electrically) to suit different bag dimensions. The bag and product is completely supported throughout the filling procedure.

The inexpensive bagging option offers an alternative to a roll stock bagging system. It's simple design means that it is cheaper to maintain and service and has technical support close by if you ever need it because it is made here in Australia by edp®.

Note: Bag type is Lynx 92 specification. No slits and 178mm wicket centres. Optional 1kg bagging head has 127mm wicket heads

SPECIFICATIONS

- * Supply Voltage: 415 VAC + Neutral + GND / 10 AMP
- * Air Consumption: 5 CFM @ 80 PSI
